To Whom It May Concern:

Summit Fire Protection was awarded the contract for fire protection installation and design at the University of Minnesota, TCF Bank Stadium Project. One of the biggest challenges of the fast paced project was to manage a complex and demanding schedule. They were able to manage the schedule very well. Additionally, Summit did a fine job of cost management, working with other trades, and maintaining a critically important relationship with the University Fire Marshall.

I would welcome the chance to work with Summit Fire again and highly recommend them for any future project.

Kind regards,
